Area Sales Manager

Dear Sir,

We have used Ramco Plastering Compound extensively for masonry & plastering works in our 'VERDANT ACRES' at Perumbakkam consisting of 176 dwelling units.

Advantages Experienced in application of the Product are

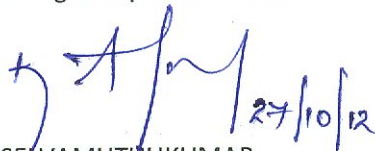

1. Workability was found good in Masonry & Plastering works.
2. We have found less hairline cracks in Plastering as compared to ordinary cement plastering.
3. Presence of Hydrated Lime goes well with bonding.

In View of the above said advantages, we recommend use of 'Ramco Plastering Compound' for masonry work in construction Projects.

Thanking You,

Yours faithfully,

For Virgo Properties Pvt Ltd
